

Khristian Degollado

INDUSTRIAL ENGINEER · DIGITAL SOLUTIONS

KD

github.com/KhrisKiller

Portfolio: KHRISTIAN.DEV

PROFILE

Industrial Engineer building digital solutions for real-world operations. I combine industrial engineering, data, web development and business systems to turn operational problems into practical digital tools — inventory systems, KPI dashboards and modern web experiences.

EXPERIENCE

Colorín

2026

Industrial Engineering Residency

- Inventory management and stock control
- Warehouse process analysis and improvement
- KPI dashboards for operational follow-up
- Excel databases for products and customers
- Process documentation and standardization
- Operational improvement proposals

AutoZone

2026

General / Operations

- Warehouse operations and merchandise handling
- Shelving, product placement and inventory control
- Day-to-day operational execution

OXXO

2023 – 2024

General Assistant

- Inventory counts and FIFO rotation
- Merchandise reception and shelf replenishment
- Scanner and cash systems

SELECTED WORK

Inventory Management System

Interactive prototype: stock status by SKU, inbound/outbound/production/adjustment movements, traceable log, filters and stock history.

Business Intelligence Dashboard

Revenue, orders, OTIF, receivables and inventory KPIs with period filters and customer drill-downs.

Web experiences — AURA & NOVA

Two fictional brands designed from scratch with distinct visual identities, fully responsive.

SKILLS

Engineering

Process analysis · Inventory management · Operations · Continuous improvement

Digital

Excel · Dashboards · Data visualization · Business systems

Development

React · Next.js · TypeScript · JavaScript · Tailwind CSS

Tools

Git · GitHub · Vercel · QuickBooks · ClickUp

APPROACH

Industrial engineering thinking applied with modern digital tools to improve processes, organize information and make operations easier to understand.

REAL PROBLEM → PROCESS →

DATA → DIGITAL SYSTEM →

DASHBOARD → BETTER DECISION
